

## LAQUA

pH ORP ION Conductivity
Resistivity Total Dissolved Solids Salinity

Benchtop Water Quality Meters F-70/DS-70 Series

#### Our concept originated from you

"Meters and electrodes become dirty so often, I wish I could keep them clean all the time."

"It would be great if I could quickly visualize the calibration and measurement results, as well as the status of the electrodes."

"If a problem occurs, I want it solved immediately!"

"It' s a pain to have to look through the instruction manual."

"Electrode stands are actually not that user-friendly."

"I want the electrode stand to move freely according to the location and what I'm using it for."

"Robust with high precision."

"Which electrode actually matches my need?"

"I want stable measurements every day."

We listened closely to each of our customers' comments, and applied what we heard to our next generation analyzer. HORIBA is proud to announce LAQUA, the water quality analyzer that answers all of your needs.

## Intuitive and easy to use touch panel operation

Intuitive control with the large capacitive touch panel. Smart navigation provides step-by-step guidance for trouble-free operation. Easy to clean glass top and round body, LAQUA is both easy and fun to use!

Operation buttons are reduced to the bare minimum

MEAS

**DATA** 

3

Calibration

Measurement

Data Management

### Simply slide your finger across the screen to switch displays

Switch between digital, graphic, and analog displays during measurement with just the flick of a finger. No need for complex actions.

#### 2-channel simultaneous measurement and display

pH value and a second measurement (such as ORP, ion, electrical conductivity) can be displayed simultaneously.

#### Accurate calibration for measurement precision.

Correct calibration is done under "stable" conditions. Calibration performed under unstable conditions is one of the big causes of measurement error. Calibration response is visualized as numerical data or a graph. With

LAQUA, you are sure about your calibration validity

#### Calibration Assistance Function

You can tell measurement value has stabilized when the graph has stabilized and the calibration stability values become smaller. "Stability" checking at a glance!

### NAVIGATION

www.horiba.com/laqua

Enjoy hassle-free operation with on-screen settings confirmation, maintenance information, and troubleshooting tips

#### Inspection Navigation

Easy navigation for meter and electrode inspections. Various industrial standards (JIS, USP, EP, JP, CP) are also supported.

## 

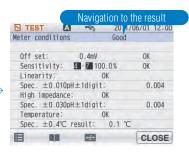

Electrode off set value is

Off set potential error

OK

NIST Hold 24.96°C

NAVI ERROR 04

Liquid junction is a ceramic of about 1mm

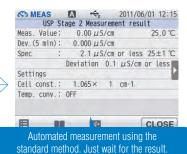

in the diameter. When this part is dirty.

it becomes as shown in the photograph.

#### Troubleshooting Navigation

On-screen support for resolving a problem that occurs during calibration or sample measurements. A user's guide is incorporated in the software to assist with any operational difficulties.

# COND pharmacopoeia mode USP EP JP CP Supports USP/EP/JP/CP

#### Application Functions

Various industry standard methods are supported by the instrument. Conductivity measurement for several country pharmaceutical pure water guidelines are incorporated with the meter.

Full-Range of Functions for Validation and Usability

For compatible models please see the P14 body specification.

Customizable auto hold function for calibration and measurement ● Periodic inspection mode:
 JIS/Pharmacopeias/Digital Simulator ● Digital memory: Maximum 2,000 sets of measurement data can be recorded (999 sets for F-71/F-74BW/DS-71 models) ● Simultaneous connection to a GLP/GMP compatible printer and PC ● Customizable print function ● Save data onto a USB flash drive ● USB PC Communication: Data storage software available as a free download for registered users. ● Multi-language support (Japanese, English, Chinese, Korean) ● FDA21CFR Part 11 (Please ask for quotation)

#### Free-arm Electrode Stand

HORIBA

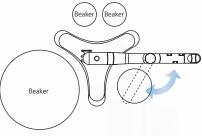

## LAQUA's free arm electrode stand can handle any container size or position.

The stand-alone free arm electrode stand can be moved wherever you like, vertically or horizontally.

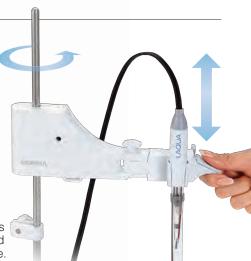

You can also use the long electrode stand\* with a telescopic shaft when working with large beakers.

#### 360°

The 360° rotaing free arm also has a full range of vertical movement.

The full range of standard movements lets you arrange a variety of large and small containers wherever you please.

## -2500 -2500 -1500 -1000

#### 450~650mm

The long electrode stand\* has a maximum length of 650mm. It can also be stored neatly thanks to the telescopic shaft.

With the long electrode stand\*,you can prepare small quantities of standard solution for calibration or large capacity containers of buffer solution without having to detach and reattach the electrodes.

HORIBA electrode technology gives you the fusion of high accuracy and ease of use

### ELECTRODE

HORIBA electrode is now even tougher and responds faster.

#### Enhanced stability and minimized drift

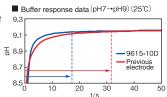

Integrating two new technologies for faster response times and optimal performance.

New technology

#### pH fast response glass membrane

(U.S. Patent No. 8262877)

The membrane contains HORIBA's unique combination of rare earth metals to improve response time by twofold and to increase durability against chemical attack.

## 02

#### Reference electrode with increased stability (Patent pending)

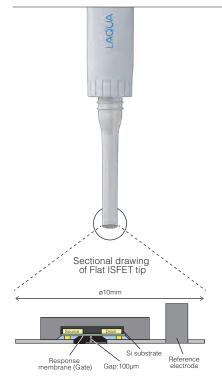

Covering the internal electrode with a cation-conductive hollow fiber membrane, liquid junction clogging by silver ions and silver complex ions is reduced to 1/1000 of the conventional technology. Furthermore, maintained internal solution concentration ensures a stable standard electrical potential.

HORIBA's glass membrane molding technology achieves strengths more than 10 times the Japanese Industrial Standards (strength tests).

New dome-shaped construction boosts strength in all directions!

Not just "unbreakable." New flat sensor innovations allow the measurement of trace sample droplets or the measurement of solid sample surface.

#### What is an ISFET(semiconductor sensor)?

ISFET is the abbreviation of Ion Sensitive Field Effect Transistor. The response membrane is equipped with semiconductor based sensor.

ISFET features

- 1. Will not crack or break like conventional glass electrodes
- 2.The sensor is flat and very small in size, enabling the measurement of extremely small samples
- 3. Easy handling and maintenance simply clean with a toothbrush
- 4.Can be stored dry

#### The flat electrode has less than 100µm distance between the housing and the sensor.

The unique structure enables to measure miniscule amount of moisture on the surface of solid objects and prevents bubbles from trapping on the sensor when measuring samples in a beaker.

#### Effects of static electricity is reduced

The combination of HORIBA's unique semiconductor device construction and improved static protection circuit means that the effects of static electricity, once the Achilles heel of semiconductor sensors, are greatly reduced.

## Precision—pH electrodes from HORIBA which answers your needs.

Stable measurement for a wide range of samples. Standard | ToupH | electrode (9615-10D)

High stability and drift reduction. No more worries about the timing of your measurement value readings.

- Uses responsive glass that is 10 times stronger than JIS standard. The domed shape provides strength in all directions, greatly reducing damage concerns.
- Constructed with smooth surfaces for easy wiping and cleaning.

Recommended

Perfect for preparing buffers. Can be used on a wide range of aqueous test solutions.

For extremely small samples Micro ToupH electrode (9618-10D)

This pH electrode with temperature compensation sensor can take measurements from samples as small as 50µL, the smallest in the world.

- Our original manufacturing technology (Japanese Patent No. 4054245) is used to produce 2-ply piping 3mm in diameter.
- Compatible with extremely small containers such as micro tubes etc.
- The temperature sensor is located at the tip for high-speed temperature response. Refrigerated samples can be measured without needing to wait for them to return to room temperature.

Recommended

Can be used for a wide range of aqueous solutions, including those that cannot be obtained in large quantities. We recommend using our specialized cleaning solution after measuring samples that contain proteins

For using a large container Long ToupH electrode (9680-10D)

283 mm length & 8 mm diameter. The long, thin design makes this electrode perfect for measuring in large containers and test tubes.

 Uses responsive glass that is 10 times stronger than JIS standard. The domed shape provides strength in all directions, greatly reducing damage concerns.

Recommended

For measuring samples such as microbe culture fluids in test tubes We recommend that it be used with the long type electrode stand (FA-70L).

#### Stable measurement can also be achieved for high viscous samples.

• The liquid junction section is constructed with a moveable sleeve that can be rinsed clean, preventing highly viscous samples from clogging the liquid junction, and maintaining stable measurement performance

#### Recommended

For highly viscous samples and solutions, and samples that contain non-aqueous solvents (such as cosmetics or paints). We recommend that you take measurements while using the graph display function to confirm stable responses. (We recommend washing with a neutral detergent after use with samples that contain oil.)

#### For the surface of solid samples Flat ISFET pH electrode (0040-10D)

#### The sensor is located on the flat surface of the electrode tip, with less than a 100 µm protrusion from the housing.

- Measurements can be made from a minute amount of moisture on the solid sample surface.
- Use of a semiconductor sensor means there are no concerns that the electrode will be damaged.
- Also perfect for measuring samples in shallow containers such as Petri dishes.
- Repalceable sensor

#### Recommended

For surface measurement of gelatinous materials such as nutrient agar, and food samples such as meat. Evaluation of sheet materials such as cloth or paper. (If the sample only has a small amount of moisture, pure water etc. is required. We recommend washing with a neutral detergent after use with samples that contain oil.)

#### For easy and safe measurement inside solid samples (0030-10D)

- material to take measurement within the sample. • Use of a semiconductor sensor means there are
- no concerns that the electrode will be damaged.
- Repalceable sensor

For measuring inside foodstuffs, such as fruits, vegetables and bread. (We recommend washing with a neutral detergent after use with samples that contain oil.)

#### For stable measurement of tap water Low conductivity/Low buffer capacity pH electrode (9630-10D)

#### For TAP WATER

#### Using the high-purity glass membrane, faster stable measurement is possible at a low electrical conductivity and low buffer capacity sample

• It enables the measurement within 90 seconds measurement (Auto hold) for tap water by using the conditioning liquid(model name 230). (95% Response is within 60 seconds)

#### Recommended

It is ideal for water quality testing in the water purification plant.

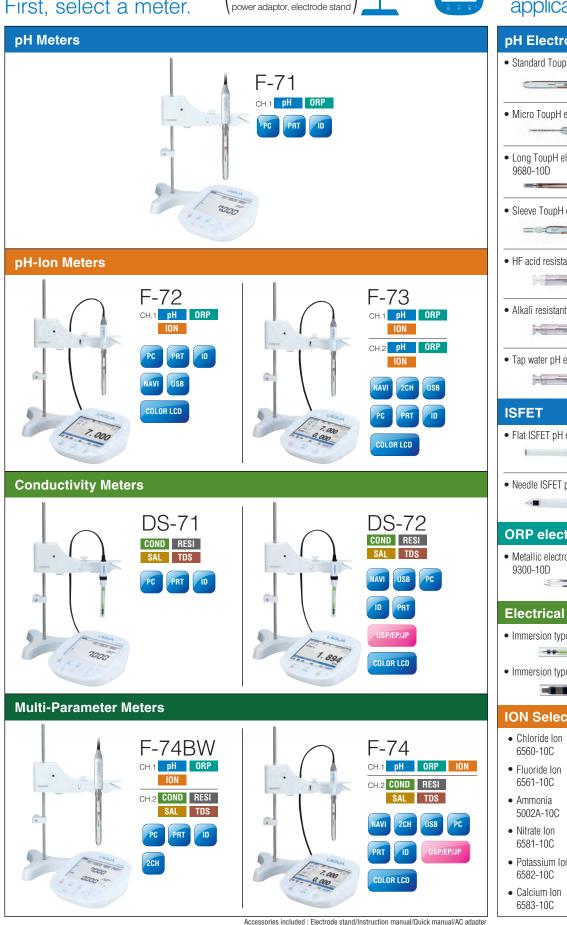

A meter to match your every need. meter + electrode set

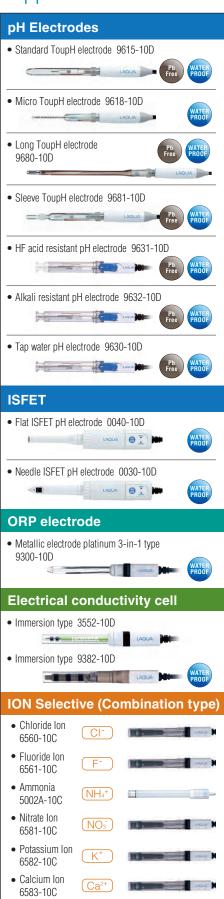

What do you measure? First, select a meter.

Meter accessories: User's Manual, Quick Guide,

Line-up of electrodes based on various applications.

### Recommended Packages

Complete sets with meter, electrode, and standard solutions

#### **Custom LCD**

#### F-71A-S

Benchtop pH / ORP Custom LCD Meter Set, complete with

- electrode stand
- glass pH electrode (9615-10D)
- pH 4/7/10 buffers & 3.33M KCl referece electrolyte (502-S)

#### **DS-71A-S**

Benchtop Conductivity / Resistivity / Salinity / TDS Custom LCD meter, complete with

- electrode stand
- conductivity electrode (3552-10D)
- conductivity standard solutions 84 uS, 1413 uS, 12.88 mS & 111.9 mS (503-S)

#### F-74BW-A-S

Benchtop pH / ORP / ION / Conductivity / Resistivity / Salinity / TDS Custom LCD meter complete with

- electrode stand
- glass pH electrode (9615-10D)
- pH 4/7/10 buffers & 333M KCI referece electrolyte (502-S)
- conductivity electrode (3552-10D)
- conductivity standard solutions 84 uS, 1413 uS, 12.88 mS & 111.9 mS (503-S)

#### **Touch Screen Color LCD**

#### F-72A-S

Benchtop pH / ORP / ION Color Touch Screen Meter Set, complete with

- electrode stand
- glass pH electrode (9615-10D)
- pH 4/7/10 buffers & 3.33M KCl referece electrolyte (502-S)

#### F-73A-S

Benchtop pH / ORP / ION, Dual Channel Color Touch Screen Meter set, complete with

- electrode stand
- glass pH electrode (9615-10D)
- pH 4/7/10 buffers & 3.33M KCl referece electrolyte (502-S)

#### **DS-72A-S**

Benchtop Conductivity / Resistivity / Salinity / TDS Color Touch Screen meter, complete with

- electrode stand
- conductivity electrode (3552-10D)
- conductivity standard solutions 84 uS, 1413 uS, 12.88 mS & 111.9 mS (503-S)

#### F-74A-S

Benchtop pH / ORP / ION / Conductivity / Resistivity / Salinity / TDS Color Touch Screen meter complete with

- electrode stand
- glass pH electrode (9615-10D)
- pH 4/7/10 buffers & 3.33M KCl referece electrolyte (502-S)
- conductivity electrode (3552-10D)
- conductivity standard solutions 84 uS, 1413 uS, 12.88 mS & 111.9 mS (503-S)

<sup>\*1</sup> The selection coefficient is a ratio of the limit concentration of coexisting ions (mol/L) to the ion concentration to be measured (mol/L); A value of 1000 means that the coexisting ions can be permitted up to 1000 times the ion measured and "N/A" means that chemical change occurs in the solid response membrane.

#### Water Quality Analyzers www.horiba-water.com

With over 60 years of engineering excellence, HORIBA's diverse range of water quality analyzers and electrodes are ideal for everyday laboratory needs through to the most demanding of applications. Visit our website for a wealth of useful information and water quality measurement tips to help you obtain the best results in your work.

#### **Benchtop Meters**

Developed using extensive feedback from users, our new LAQUA meters deliver the best solution for water quality analysis. Our LAQUA website features an online 'Selection Guide' to enable you to find the perfect LAQUA meter and electrode for your need.

#### **Handheld Meters**

In the lab, in the field or anywhere you need it. LAQUA Handheld meters are designed for use with one hand and with an IP67 waterproof rating and shock-resistant casing. Meters can be used for long periods, even in dark places, making it ideal for field measurements in rivers and lakes.

#### **Pocket Meters**

Analyzing water quality is simplified when using our LAQUAtwin range of meters. Designed to produce accurate and reliable results. Anyone, anywhere, at any time can measure samples easily with a LAQUAtwin meter. See just how good they are at our website.

#### **Electrodes**

Various electrodes to match any application. A wide range of products for both benchtop and portable systems are available, including easy and reliable standard models, application-focused models for small samples or large containers, and special electrodes for specific sample characteristics.

#### **SUPPORT** HORIBA CUSTOMER SUPPORT SYSTEM

HORIBA offers a variety of services to conform to quality standards and international guidelines such as GLP, GMP and ISO

#### **Technical Support**

Please contact us with any technical questions about our products.
